Reliable Electrics Nigeria Limited

ENTERPRISE FIELD SALES & COMMERCIAL DISTRIBUTION CRM

LIVE PRODUCTION

Central Operations: Phase 1, 32B Oguntona Crescent, Gbagada, Lagos • Distributor of Lighting & Switchgear Demo & Stakeholder Guide

Executive Summary: This document outlines the exact operational roles, system permissions, and step-by-step actions for every stakeholder participating in a live demo of the Reliable Electrics CRM. The application bridges executive distribution planning with boots-on-the-ground field sales execution across commercial corridors in Lagos.

1. Live Access & Seeded Demo Directory

Live Application URL: https://crm-web-production-a3173e81.up.railway.app

1-Click Quick-Login Switcher: Active on the `/login` screen. Tap any role to log in instantly without entering credentials.

2. Stakeholder Responsibilities Matrix

STAKEHOLDER	PRIMARY PURPOSE & FOCUS	KEY CRM MODULES ACCESSED
Executive Management / Admin	Distribution strategy, sales target governance, territory allocation, daily auditing of field teams, credit approval, and dispatch logistics.	Executive Dashboard, Date-by-Date Daily Tracker, Agent Onboarding, Customer Directory, Orders & Waybills, CSV Reports.
Field Sales Executives	Boots-on-the-ground client relationship management, physical store check-ins with GPS, customer onboarding, taking instant purchase orders, and payment collections.	Field Dashboard, Geolocation Check-In (`/activities/check-in`), Store Onboarding, Order Booking, Payment Entry, Mobile Navigation.
Commercial Customers (Retailers / Contractors)	Wholesale stock replenishment, transparent pricing tiers, agreed credit limits, formal delivery waybill inspection, and payment reconciliation.	Customer Directory Profile, Product Catalog, Order Invoices, Delivery Waybills with serial/dispatch verification.

₦50,000,000
LAGOS MONTHLY TARGET

4 Corridors
ACTIVE SALES TERRITORIES

100% Verified
GPS GEOLOCATION CHECK-INS

3. Executive Management (Admin) Workflows

The Managing Director has unrestricted governance across commercial metrics, field operations, and accounting.

1. **Executive Dashboard Overview (`/dashboard`)**
   Inspect real-time revenue attainment vs target (₦), total active field executives, registered commercial stores, and pending order dispatches. Review territory distribution charts and the live activity stream.

2. **Date-by-Date Daily Activity Tracker (`/activities/daily`)**
   Select **any specific date** on the interactive calendar picker. The view summarizes:
   - Daily tally: Total store visits, orders booked, collections logged, new retailers onboarded.
   - Agent Breakdown: Individual cards for Chinedu, Fatima, Emeka, and Tunde.
   - Time-stamped audit logs with visit notes and **clickable GPS coordinates** linking directly to Google Maps.

3. **Field Sales Executive Onboarding (`/agents/create`)**
   Register new field agents into the CRM. Set official email, unique Employee Code (`REL-FE-XXX`), assigned sales territory, monthly sales quota (₦), daily visit benchmark, monthly store onboarding quota, and allocated company vehicle (Motorbike/Van/Car).

4. **Customer Onboarding Audit & Directory (`/customers`)**
   Audit all electrical retail stores and building contractors onboarded by field agents. Verify exact onboarding dates, originating field agent, assigned credit terms, and physical GPS storefront coordinates.

5. **Activity Audit & One-Click CSV Export (`/activities/report`)**
   Filter activities by agent, activity category, and custom date range. Click **Export CSV** to immediately generate an audit spreadsheet for board meetings, transport allowances, and commission calculations.

6. **Sales Orders & Formal Printable Waybills (`/orders`)**
   Manage order statuses (`Pending` , `Confirmed` , `Shipped` , `Delivered`). Open any order to generate a branded, printable A4 **Delivery Waybill & Invoice** from Gbagada central warehouse with signature sign-off lines.

Key Management Decision Point: The Date-by-Date Daily Tracker solves field opacity. Executive management can verify whether a field executive was physically present at Alaba or Ikeja at the reported time via the GPS link and corresponding order booking timestamp.

Reliable Electrics Nigeria Limited

FIELD EXECUTIVE WORKFLOWS

Role: Field Sales Agent

4. Field Sales Executive Workflows

Field agents use mobile smartphones and tablets on the road to register storefronts, check in, and close deals.

1. **Agent Field Dashboard & Mobile Navigation Bar**
   When logged in as a field agent, the interface personalizes to their territory, monthly quota attainment bar, today's visit target counter, and mobile-optimized sticky bottom navigation bar (Home, Daily Log, Check-In, Customers, Orders).

2. **Mobile GPS Check-In (`/activities/check-in`)**
   During a physical client visit, the agent taps **Check-In**:
   - Selects existing customer or enters prospective client name.
   - Selects visit purpose (Routine Restock, Pitch, Order Taking, Debt Collection, Complaint).
   - Taps **Capture Current Location (GPS)**: Browser automatically stamps decimal coordinates.
   - Enters visit notes & outcomes, then submits. Instantly updates the Admin Daily Tracker.

3. **Customer Onboarding in the Field (`/customers/create`)**
   When discovering a new electrical dealer or contractor, the agent completes the onboarding form:
   - Business Name, Owner/Contact Name, Phone, Email, Physical Address, and Landmark.
   - Category: Wholesaler, Lighting Gallery, Retailer, Electrical Contractor.
   - Captures store GPS location, sets agreed Credit Limit (₦) and Payment Terms (e.g. Net 14 Days).
   - Automatically stamps onboarding date and links the client to the agent's account.

4. **Instant Sales Order Booking (`/orders/create`)**
   Select customer and pick items from the catalog (LED floodlights, distribution boards, MCBs, chandeliers, copper cables). Quantities, wholesale discount tiers, and totals calculate live. Submit order to initiate warehouse dispatch.

5. **Logging Payment Collections (`/payments/create`)**
   Record bank transfers, POS receipts, cheques, or cash collected from customers against active orders. Enter transaction reference to instantly credit customer balance.

Zero App Installation Required: Built as a high-performance web application accessible on any Android or iOS browser with native geolocation support, low data consumption, and fast load times.

5. Recommended 10-Minute Demonstration Script

Follow this exact chronological sequence to showcase the system to executive stakeholders or prospective clients:

TIME	DEMONSTRATION STEP	WHAT TO HIGHLIGHT & NARRATE
0:00 – 1:30	**1. Landing & Role Switcher** `/login`	Show the 1-click Quick-Login switcher. Explain that Reliable Electrics operates a dual structure: Executive Management at Gbagada HQ and Field Sales Agents across Lagos commercial hubs.
1:30 – 3:30	**2. Executive Dashboard** `/dashboard` (Admin)	Log in as Admin (Engr. Adekunle Lawal). Highlight Lagos monthly target (₦50M), quota pacing, active field agents count, territory distribution chart, and the top performing agent leaderboard.
3:30 – 5:30	**3. Date-by-Date Daily Tracker** `/activities/daily`	Pick today's date on the interactive calendar. Show how management sees every agent's activities for that specific day: visits, orders booked, payments collected. Click a GPS link to show Google Maps verification.
5:30 – 7:00	**4. Switch to Field Agent** `/activities/check-in`	Switch to Chinedu Okeke (Ikeja Hub). Demonstrate mobile view. Conduct a live Check-In: select customer, select "Routine Sales Visit", tap "Capture GPS", enter notes, and submit.
7:00 – 8:30	**5. Onboard New Customer** `/customers/create`	Fill in a new store (e.g., "Apex Power Solutions, Alausa"), capture GPS, set credit limit and payment terms. Submit and show that the customer is immediately added with today's onboarding date.
8:30 – 9:30	**6. Order Booking & Waybill** `/orders/create`	Create an order for 20× 50W LED floodlights and 5× distribution boards. Open the order and click **Print Waybill** to reveal the print-ready warehouse dispatch document with signature lines.
9:30 – 10:00	**7. Verification & CSV Export** `/activities/report`	Switch back to Admin. Refresh the Daily Tracker to prove the new check-in and order appeared live. Click **Export CSV** to demonstrate automated management reporting.
